

### BOOX STAND E28

Linear and elegant, BOOX is the brand new modular shelving system designed by Alberto Basaglia and Natalia Rota Nodari. The X joint distributes the weight of the supporting frame, which is made of extruded aluminium profiles. The shelves are made of etched or transparent glass, and the panels and doors are made of metacrylate which is available in a variety of colours. BOOX can be endlessly extended in width and up to five modules in height. BOOX can be used as a holding unit, a bookcase or as a display cabinet. **CIRCLE 112**

### SHOE RACK

#### STAND B70

Providing an elegant solution to shoe storage is the j-me shoe rack which is available in standard lengths of 70cm and 120cm. The shoe rack is manufactured from stainless steel with a satin brush finish and is ideally suited for stacking within cupboards or exposed in hallways to create an appealing feature. **CIRCLE 113**

## MASS

CONCRETE SURFACES

### DIGITAL TECHNOLOGY

#### STAND E28

The Cast Advanced Concretes were showing two new digital image technologies in its hi-tech concretes: MASS2 waterjet cut panels and shallow relief wall panel castings. The popular MASS1 Concrete Worksurfaces were also on show in the form of Kitchen Worktops and Vanity units as well as a CAD shaped orange concrete table top. **CIRCLE 115**

### DOOR & WINDOW CONTROLS

#### STAND G40

GEZE UK received an overwhelming response from architects and specifiers as it exhibited at 100% Detail at Earls Court for the first time. The new TSA 160 UFO attracted substantial interest on GEZE's custom-built stand, while the Slimdrive EMD-F and Slimdrive SL bolted to glass, were popular. The Manual Sliding Wall system received many enquiries, proving that flexible spaces are key to modern architectural design. GEZE was chosen to exhibit at the show, selected by a panel of architects, engineers and other industry experts. **CIRCLE 114**

### ELECTRIC TRACK

#### STAND L62

Silent Gliss set a new standard with its fifth generation of electric curtain tracks. The further fine tuned electric track systems, the 5400 and 5420, combined with its new top class low voltage motor 9020, stands for unmatched silence. **CIRCLE 116**
